

The Windsor offers convenience with exceptional refinement— all the things you cherish in a home. From the moment you set foot in the elegant entry way, you'll sense the subtle touch and attention to detail so characteristic of Ponderosa.

In admiring the beautiful spiral staircase you'll note how it gracefully separates the living room from the dining room. This is an entertainer's dream, a showcase that doubles as your retreat from the everyday world. Your guests will delight in the downstairs bedroom with its own private bath.

The well-appointed kitchen makes preparing meals a pleasure, and your family will enjoy gathering in the bay window breakfast nook for meals.

The upstairs landing sports a bird's eye view of the open air living areas below. To one side of this balcony you'll find a convenient grouping of bedrooms and a cozy den. On the other side is the fabulous master bedroom, the highpoint of the upstairs—with its vaulted ceilings and large bay window. Imagine having your own two-sided fireplace between the bedroom and bath. An oval soak tub, separate shower, and an enticing vanity area with brass finish fixtures complement the suite. What luxury!

If excellence is a quality necessary for your new home, the Windsor will meet the definition well. Come home to Woodranch.
